1899.

State of Montana.
Department of Public Instruction.
Helena, December 1, 1898.

To His Excellency, Robert B. Smith,

Governor of Montana.

Sir:—In compliance with the requirements of law, I have the honor to submit the fifth biennial report of the Department of Public Instruction for the school years ending August 31, 1897, and August 31, 1898.

Very respectfully yours,

E. A. CARLETON,
Superintendent Public Instruction.

State Superintendent's Report.

REPORTS OF SCHOOL OFFICERS.

The failure of school officers to make their reports to this office within the time required by law accounts for the lateness of this report.

Under the law, boards of school trustees are required to report, annually, to the county superintendent, on or before the 1st day of October in each year. The failure of trustees to make their report at this time, makes it impossible for county superintendents to file their reports by November 1st, as the law requires. This delays, as stated, the report of this department. But you very generously extended the time for making our report.

An examination of the reports of this department from its establishment shows that in scarcely any year have these school reports been made at the time required. In view of this, I believe authority should be given the county superintendent to make the district report, if necessary, and charge the same to the district. Probably a notice from the county superintendent to the trustees that, unless the report was made at a stated time, she would make it or cause it to be made at the expense of the district, would have the effect, in almost every instance, of securing the report on time.

CONDITION OF SCHOOLS.

During the past two years the public schools of the state, as a whole, have made marked improvement, as any one in touch with the work, for this period, can testify. As we said in our annual report for 1897, "We have more school houses, more pupils and more teachers than ever before; and, it may be added, we have more good schools and more competent teachers than we have ever had, in the history of the state." While we have made progress, educationally, there yet remains much to be done before we can enjoy the full benefits of public schools. The causes that have contributed to the improvement of our schools for the past two years, including institutes, the State Normal, the State University and Agricultural College, institute instructors and better supervision on the part of county superintendents,

are considered under separate heads. One agency in this work—better teaching—should also be mentioned. One of the most encouraging signs of the times is the professional spirit manifest among the teachers of the state.

I desire to here make public acknowledgment to the county superintendents of the state, through whom much of the work of this department is performed, for their most cordial and enthusiastic co-operation and support. The school officers of the state have also been most willing to receive any suggestion and to act upon it in the interest of the public schools.

STATISTICAL.

From the tables which are made a part of this report, we see that there are 669 school districts in the state, an increase of 99 since 1896; that the number of census children is 49,478, an increase of 7,260 over 1896, and an increase of 3,299 over 1897; that the enrollment for 1898 is 35,070, being a remarkable increase of 7,159 over 1896, and an increase of 4,634 over 1897; 1,086 teachers have been employed during the year 1898, while but 953 were employed in 1896; that \$575,332.04 was apportioned to the 669 school districts of the state, as against \$381,893.46 for 1896, being an increase of \$193,438.58 in two years. In 1896 there were 10,197 volumes in school district libraries; in 1898 there are 16,474, making an increase of 6,277 volumes.

A study of these figures, as well as the other data contained in this report, shows how great has been the increase in everything pertaining to our public schools. Not only have all of our school interests greatly increased in the past two years, but these same interests are now increasing at a very rapid rate.

Comparative table of the financial and statistical reports of Montana from 1868 to the present year, 1898.

Year.	No. Districts ..	Enrollment	No. Teachers employed	No. of School-houses	Average salary of teachers...	Value of School property	Amount appropriated during year
1868	25	1,359	27	15			\$12,099 48
1872-3	91	3,517	99	51	\$68 41	\$21,192 00	33,161 50
1874-5	96	3,837	99	76	61 45	48,009 00	31,821 68
1876	99	4,271	110	83	63 50	56,080 00	35,287 06
1877	103	4,561	110	87	61 02	55,485 00	35,996 46
1878	105	5,315	116	88	59 70	88,284 52	44,477 79
1879	...	5,885	145	99	58 45	99,344 60	54,051 93
1880	130	7,070	161	119	61 19	118,912 45	59,463 16
1881	144	9,479	177	132	62 50	140,250 33	67,647 38
1882	155	10,482	191	143	66 26	235,708 00	89,187 96
1883	180	12,485	226	160	58 80	197,300 00	196,930 44
1884	216	15,515	292	198	67 00	335,370 89	168,993 00
1885	249	16,626	337	249	71 00	377,766 00	225,896 18
1886	272	20,198	377	250	70 00	437,588 00	288,575 00
1887	289	23,165	394	266	65 50	548,367 00	288,333 00
1888	316	27,600	442	305	62 50	646,670 00	371,442 37
1889	344	36,803	507	319	66 56	698,798 23	325,617 25
1890	361	27,821	531	314	60 10	994,378 25	289,608 23
1891	383	28,708	574	341	50 90	1,099,478 00	354,353 27
1892	483	35,496	659	422	54 25	1,569,355 00	425,866 91
1894	495	33,562	801	529	51 25	1,660,730 00	416,370 14
1896	565	41,201	953	549	51 16	1,447,581 00	381,893 46
1897	605	46,179	1,020	625	60 29	1,656,259 50	481,239 65
1898	669	49,478	1,086	656	60 00	1,875,964 75	575,332 04

From 1868 to 1889 the school age was from 4 to 21 years.

In 1890 the school age was from 5 to 21 years, and in 1891 it was from 5 to 21.

Since 1892 the school age has been from 6 to 21 years.

HISTORICAL.

The Territory of Montana was created by act of Congress May 26, 1864, but the first report of this department, on file in this office, is that of the Hon. T. F. Campbell, Territorial Superintendent of Public Instruction, for the year ending November 30, 1868, and contains merely incomplete data of the counties of Madison, Gallatin, Deer Lodge, Lewis and Clarke and Meagher. There is no report of Jefferson, Choteau, Missoula and Beaverhead counties for the year. The data contained in this report is so incomplete that it is of little value.

The first regular report of this department is that of the Hon. Cornelius Hedges, Superintendent of Public Instruction, for the years 1872-3. This re-

port gives quite full data of the nine counties above named. By reference to the comparative table of statistics we see how great and steady has been the increase in the number of pupils in the state, and the consequent increase in the number of teachers, school houses and, in short, in everything that pertains to public education.

In 1868 there were, approximately, 2,000 children of school age, taught by about 40 teachers. To-day we have 49,478 children of school age, taught by 1,086 teachers.

The public schools of Montana have grown and developed as the state has increased in population and in material wealth.

Our people have ever taken a just pride in their free public schools, and have been most liberal in voting the money necessary to maintain an excellent system.

SCHOOL LEGISLATION.

The following concerning the text-book commission and free text-books is taken from our annual report of 1897. As this report was not published, it is thought best to insert it here. We have made such modifications of this part of the report of 1897 as the experience of the past year seemed to justify.

TEXT-BOOK COMMISSION.

The last legislature passed a law creating a State Text-book Commission, to be composed of the State Superintendent, who should be the chairman, the Attorney General, the Presidents of the State University and the State Agricultural College, and three public school teachers actively engaged in the work. The membership of the commission was completed by the appointment by the Governor of Prof. J. G. McKay, principal of the Butte high school; Prof. M. A. Stapleton, superintendent of the Anaconda schools, and Prof. E. O. Busenburg, principal of the Glendive schools.

By the provisions of the law, the commission was required to meet on the first Monday in May, at the office of the Superintendent of Public Instruction, for the purpose of selecting and adopting a uniform series of text-books for use in all the public schools of the state, for a period of six years. The commission met at the time and place designated and selected a complete

list of text-books for all public schools below the high schools. Bids for furnishing text-books were received and considered from nineteen publishing houses, as follows:

Beverly Harrison, New York.
Maynard, Merrill & Co., Chicago.
Christopher Sower & Co., Philadelphia.
J. B. Lippincott Co., Philadelphia.
D. R. Augsburg, Salt Lake City.
B. E. Calkins, Butte.
Houghton, Mifflin & Co., Boston.
Thompson, Brown & Co., Boston.
The John Church Co., Cincinnati.
The Prang Educational Co., Chicago.
H. G. Phelps, Bozeman.
A. Lovell & Co., New York.
Ginn & Co., Chicago.
Rand McNally Co., Chicago.
American Book Co., Chicago.
D. C. Heath & Co., Chicago.
Sheldon & Co., Chicago.
Allyn & Bacon, Chicago.
Becktold Printing & Manufacturing Co., St. Louis.

The sessions of the commission lasted for four days, and a careful examination was made of the books offered. The people of the state are to be congratulated upon the manner in which the Text-book Commission performed its important duty. While scandal of the very worst sort has often attended the selection of books by the legislature of this as well as other states, and has frequently attended their selection by boards of education, and commissions, not even a whisper was heard of any attempt to improperly influence any member of this commission. The success of this method of selecting school books has been fully demonstrated. It was a great and radical step forward. The books selected give, I believe, general satisfaction. We do not give a list of the books selected, for the reason that it has already been printed.

High school books were not adopted, there being some doubt as to the authority of the commission in this particular. No specific opinion on this question has been rendered by the Attorney General, but since the adjournment of the commission this office has held that the commission had no authority to select high school books.

STATE APPROPRIATION.

We are just beginning to appreciate the School Income Fund, and to realize the growing importance of it to the common schools. Since the organization of Montana as a territory, our people have most generously supported the public schools by a direct tax. While the amount of the state appropriation is not yet large, it will constantly increase, and should become at no distant day sufficiently large to relieve the people to an appreciable extent of a portion of the burden they now carry to maintain their common schools.

Under the law, the State Superintendent apportions, between the 1st and 10th days of February, the State School Income Fund to the different counties in proportion to the number of census children.

But three state appropriations have been made. The first, in 1896, amounted to \$51,027.60; the second, in 1897, to \$17,731.56; and the last, that of 1898, to \$28,630.98. It is estimated that the state appropriation for 1899 will be about \$50,000, or approximately one dollar to each census child.

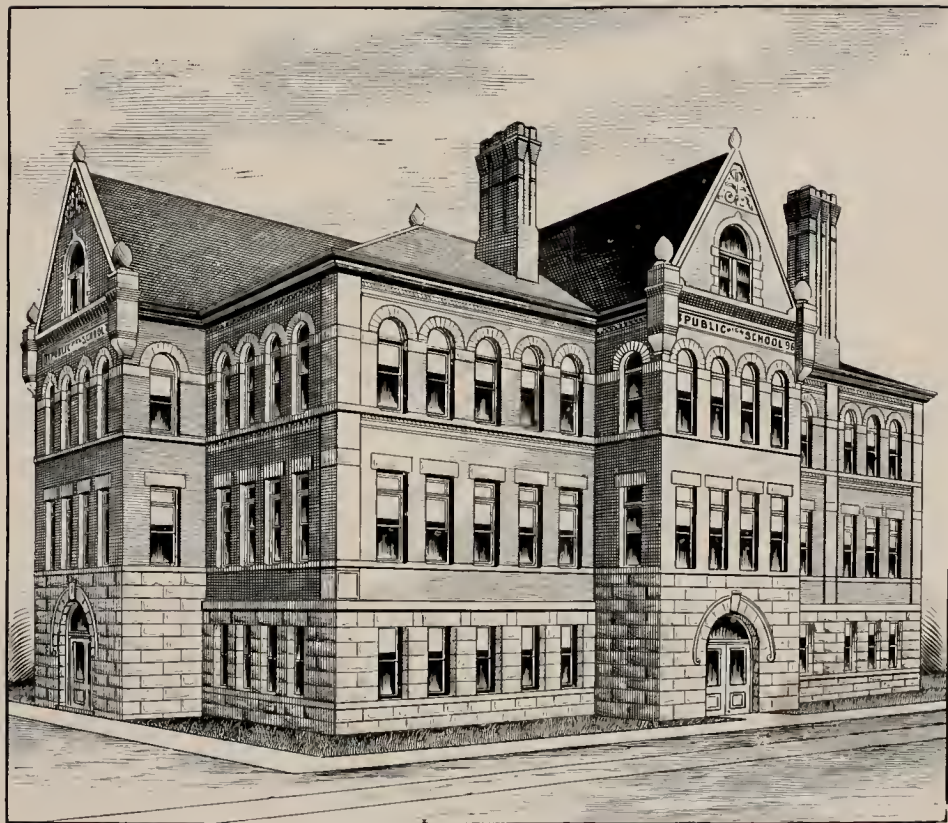

The first appropriation was much larger than the other two by reason of the fact that the fund had been accumulating in the hands of the State Treasurer for some five or six years, and, there being no law authorizing its distribution, it was held in the state treasury, drawing no interest to the benefit of the state. After the law was enacted authorizing its distribution, the accumulated fund was apportioned. This fund is made up of the interest on all invested school funds of the state, and all rents accruing from the leasing of school lands.

COUNTY INSTITUTES.

Section 1900 of the political code reads as follows: "The county superintendent in every county in which there are five or more school districts, must hold one teachers' institute in each year; and every teacher employed in a public school in the county must attend the institute, and participate in its proceedings."

As every county now has the requisite number of school districts, it is made the duty of every county superintendent to hold an annual institute. Under this law, institutes were held in twenty counties of the state in 1897, and there have already been held, at this writing, December 6, 1898, twenty-one institutes, and arrangements are being made to hold them in the three remaining counties. The law requires the State Superintendent to attend

HIGH SCHOOL BUILDING, BUTTE.

and assist at the institutes. As far as the appropriation to this office would permit, I have assisted in the institute work. In 1897 I instructed in seventeen institutes and lectured in the evening. I have already attended seventeen institutes this year, at the most of which I delivered a lecture at the evening session.

These institutes are held by the County Superintendents, under the rules and regulations adopted by this department.

The character of the institute work for the past two years has been of a high order. The State Board of Education licenses competent teachers to instruct in the institutes. A goodly number have been licensed, and the county superintendents select their instructors from those holding such licenses.

In my judgment, no one factor has contributed more to the improvement of our schools than the annual county institute. The work of the Normal School and the other state educational institutions has been instrumental in bringing our public schools up to their present standard.

The teachers have shown a most commendable spirit and eagerness to improve. The splendid professional spirit, existing among the more than one thousand teachers of the state, has been, in no small degree, fostered by the institute work.

The good results of the institute work of last year were plainly to be seen this year. The institute has inspired the teachers to nobler effort and given them a fuller and clearer understanding of the science and art of education.

The Fifth Legislative Assembly passed a law prohibiting the holding of institutes in the months of June, July and August. While most of the county superintendents prefer the fall months to any of the above for institute work, occasionally one desires to hold the institute in the summer. I think in such cases the right should be given to hold it during vacation. I, therefore, recommend the repeal of this law.

RURAL SCHOOLS.

While Montana has made marked progress, educationally, for the past two years, it is apparent that, in the small rural schools, the results are far from satisfactory. This must inevitably be the case as long as the present conditions exist. The rural school problem has been, and, in most states, still is, the greatest educational problem of the times. It is, in my opinion,

and assist at the institutes. As far as the appropriation to this office would permit, I have assisted in the institute work. In 1897 I instructed in seventeen institutes and lectured in the evening. RURAL SCHOOLS.

While Montana has made marked progress, educationally, for the past two years, it is apparent that, in the small rural schools, the results are far from satisfactory. This must inevitably be the case as long as the present conditions exist. The rural school problem has been, and, in most states, still is, the greatest educational problem of the times. It is, in my opinion,

the great school question in Montana. Says Dr. W. T. Harris, Federal Commissioner of Education: "The movement to improve rural schools * * * seems to be one of the most important educational and economic movements of the time." In the small districts, with from five to fifteen children of school age, it is impossible to maintain much, if any more, than the constitutional term of school—three months. The teachers, as a rule, are the cheapest that can be found and have the lowest grade certificates. Occasionally a district has not sufficient funds to maintain the necessary three months of school, without which no money can be apportioned to it. For the remaining nine months of the year the children are out of school, away from school influences, and forget nearly all they learned at school. They must begin next term very near where they began the term before. They become discouraged and, very often, quit the school for good. The patrons of these schools pay just as high taxes as the patrons of the larger and graded schools. They are just as much concerned in the education of their children as any one. Why should they not have as good school advantages? It is no answer to say that because they live in the country, in the thinly settled portions, they cannot be expected to have more than three or five months of inferior school each year. We are firmly convinced that the state owes to every boy and girl within her borders a good common school education. Upon the proposition that education is the surest and best safeguard of American institutions is this conviction based. But under present conditions the state does not afford to all our youth in the country districts an opportunity to get a good common school education. Our people in these sections, seeing that their children were deprived of a fair chance to get an education, that their opportunities in no manner compared with the opportunities of children in urban schools, and fully believing that the state should come to their aid in this all-important matter, caused a bill to be introduced into the Fifth Legislative Assembly for their relief. It provided that the first apportionment of school moneys to the amount of ten per cent. should be made in equal amounts to each district in the county, regardless of the number of census children. The bill passed the House, but was reconsidered and finally defeated. It met, very naturally, the objection of all the city and large school districts of the state. But the fact that it passed at all is significant of the feeling of the rural sections regarding this question.

The large districts will always oppose such a measure as this. The people in these districts feel that, under the present law, they contribute to the support of the country schools all that can be fairly asked of them. Indeed, complaint is made in some quarters that they contribute more than they ought. Under the present law, the apportionments being made according to

the number of school census children in each district regardless of the amount of taxes paid by the district, the larger districts must assist in supporting the schools in the country. I do not think that the rural school problem can be solved in this way, neither do I believe such a solution altogether just.

Difficult as the question is, I believe it can be reasonably solved. Other states have grappled with it, and their experience should be of profit to us.

In Maine, Massachusetts, New York, Minnesota, Nebraska, and, I believe, in a number of other states, legislation on this subject has been had. The general plan in these states, and the one advocated by nearly all students of this question, is the consolidation of small districts and transportation of pupils at public expense when living at a great distance from school. In some states the school districts have been abolished and the township system established in lieu of the direct system. In those states that have abolished the districts, the town is the unit of political organization, as the county is the political unit in the Western States.

If school districts were abolished in Montana, the county would, of necessity, become the educational unit, and schools would only be maintained in those places that would accommodate the greatest number of pupils. Those living at a distance from the school would have to be transported to it at public expense. This plan, however, has met with considerable objection, and on the part, too, of those whom it is designed to benefit.

The Mississippi Valley Democrat and Journal of Agriculture, published at St. Louis, has taken up this question of better rural schools. Last summer it published a number of most valuable articles on this subject from State Superintendents, including one from the Superintendent of Montana. These articles are most valuable as showing the drift of educational sentiment in this country on this great question, besides pointing out a way of improving our country schools. Nearly all favor the consolidation of the smaller districts and the transportation of pupils at public expense.

By combining the smaller schools there is no increase of taxation, but a much longer and better school is secured. Children are being educated in these schools to-day at an expense of from \$30 to \$50 per capita, with a term of three to five months a year, whereas they should receive at least eight months of school a year at a cost not to exceed \$20 to \$25 per capita.

During the past school year 35,070 pupils attended the public schools some portion of the year. There was expended for school purposes during this time almost a million of dollars, or, to be exact, \$993,607.66. The per capita cost of the schools for the whole state is \$28.33, while the per capita cost of the United States is only \$18.57. It costs Montana approximately, \$10

per capita more for her schools than the average cost for the country, and that, too, when our schools are in session only a little over five months in the year on the average, while the average length of the term for the whole United States is a trifle over seven months a year. When we consider the great number of districts with less than twenty pupils attending school, or even the great number where less than a dozen attend, we can understand the enormous expense of maintaining schools under such conditions, and why our per capita cost of education is so much greater than the average for the United States.

During the past year 290 schools were maintained in the state with less than twenty pupils enrolled; 191 with less than fifteen, 91 with less than ten pupils; 12 schools enrolled but nine, 21 enrolled eight, 14 enrolled but seven, and 9 enrolled only four. In five districts the enrollment was only three; in three districts it was two, while in one district a public school was maintained and but one pupil was enrolled for the whole term.

Maintaining schools under such conditions is most expensive, and, in my opinion, wholly unjustifiable. How much better it would be to consolidate such schools, thereby affording the children an opportunity to attend much longer and have a much better school. Those living at a distance from the school should be, as already stated, carried to it and returned home in good safe vehicles, at public expense.

I am of the opinion that money enough is spent in the state each year to give every pupil eight months of good school. After a careful consideration of the different plans proposed, I believe a beginning can be safely made toward the solution of this problem by granting to school boards in the small districts authority to contract with other districts for the instruction of pupils residing in said small districts, and also giving them authority to transport the pupils at public expense.

Provision should also be made for allowing the district to vote upon this question at the annual or special election. The effect of such a law would be to practically unite the smaller districts, for purely educational purposes, while they would still maintain their district organization, and could establish a school within their limits whenever the trustees thought best. A similar law exists in Nebraska, and in those districts which have availed themselves of it, State Superintendent W. R. Jackson says: "Nothing but good reports are heard of it."

While this law does not go far enough, it might be the best, perhaps, to start with. I earnestly recommend the matter to your most careful consideration, and trust that the legislature will so deal with this question that longer terms of school will be provided for the small districts of the state.

CONVENTION OF COUNTY SUPERINTENDENTS.

Believing that the time had come for unifying, as far as practical, the public school work of the state, and that the best interests of the schools would be subserved, this office, on July 16, 1897, issued a call for a meeting of the County Snuperintendents of the state on August 27, 1897, in Helena. The following program was prepared by the Superintendent of Public Instruction:

1. Address by the State Superintendent.
2. Consideration of the Question of Rural Schools, which will be discussed in the following order:
 - (a) Adoption of a course of study for the Rural Schools of the State.
 - (b) How to secure longer terms.
 - (c) How to secure better instruction.
3. Institutes--County and State.

Under this head the discussion will be conducted with a view of adopting a uniform course of study for county institutes.
4. County Supervision of Schools.

How can County Supervision be made thorough and effective?
5. Question Box.

All questions relating to the common schools which any County Superintendent desires answered will be admitted to the Question Box and the same will be answered by the State Superintendent. Questions should be carefully written upon slips of paper and placed in the box by 2 o'clock on Friday.

The sessions were held in the lecture room of the high school. The following counties were represented by their respective County Superinetndents:

Beaverhead, Miss Maidie Rife; Broadwater, G. R. McDonald; Carbon, Mrs. M. A. Kearns; Cascade, Miss Ina Craven; Choteau, Miss Margery E. Jacoby; Custer, Mrs. Laura Zook; Deer Lodge, Miss Annie Quigley; Gallatin, Miss Ida Mack; Jefferson, Miss Lilian Carey; Lewis and Clarke, Miss Kathryn Johnson; Meagher, Miss S. E. Curtis; Missoula, Miss Harriet Hord; Ravalli, Miss Kittie Ostermeyer; Silver Bow, Miss Mary Mullins; Sweet Grass, Miss Bessie H. Merrielees; Park, Miss Anna McDermott; Yellowstone, G. F. Burla.

There were also present and participating in the proceedings of the convention, President Oscar J. Craig, of the State University; President D. E. Sanders, of the State Normal School; Miss Minnie A. Reifenrath, Ex-County Superintendent of Schools of Lewis and Clarke County; Frank C. Patten, Librarian of the Helena Public Library; Hon. A. C. Logan, Ex-Territorial

Superintendent of Public Instruction; Superintendent J. E. Klock, of the Helena schools; Prof. W. H. Johnson, principal of the Helena high school; Hon. R. H. Howey, Ex-Territorial Superintendent of Public Instruction; Miss Nannie Woodman and Miss Sarah J. Rogers, of the Helena schools; Prof. H. E. Pearis, of the Marysville schools; Mrs. R. H. Howey, and others.

The State Superintendent acted as chairman of the convention, and C. C. Wylie was appointed secretary.

As a Committee on Resolutions, the chair appointed Superintendents Burla and Rife, and President Oscar J. Craig.

Two sessions were held each day, the time being devoted to the discussion of the various topics of the program. At the close of the convention the following resolutions, reported by the committee, were adopted, representing the sense of the convention in regard to the various topics discussed during the meeting:

To the State Superintendent and County Superintendents of Montana:

Your Committee on Resolutions would respectfully report as follows:

Whereas, The purpose of this convention is to advance the cause of education in our common schools, and to devise plans for a more efficient supervision of the same; and,

Whereas, The aim of this convention can be accomplished only by the earnest co-operation of the county superintendents, with the State Superintendent of Public Instruction; therefore, be it

Resolved (1), That the County Superintendents of the State of Montana pledge their earnest co-operation in and undivided support to the measures and plans adopted by this convention, namely: The adoption of a course of study for the ungraded schools; the establishment of a uniform course of instruction in county institutes, and the abolishing of the school district and establishing county boards of education.

(2) We most earnestly solicit the co-operation of the press of Montana in molding public opinion and bringing about such legislation as may have for its purpose the school reforms suggested by this body.

(2) That we express our entire confidence in our State Superintendent, Mr. Carlton, and appreciation of the efforts that are being put forth by him for the improvement of the schools of Montana.

(4) That we extend our thanks to the educators, not county superintendents, who have so ably assisted us in the work of the convention.

(5) That a copy of the proceedings of this convention be furnished the press for publication.

This convention, the first of its kind ever held in the state, has been productive of much good. A program of institute work was adopted by which this very important feature of educational work has been greatly improved. It brought the county superintendents together, and they became acquainted with one another and with one another's work in supervising the county schools. The convention, also, afforded the county superintendents a good opportunity of becoming acquainted with many of the best institute instructors of the state, who were present at the meeting. We think it not too much to say that more positive benefit has resulted to the schools from this convention than from any other educational meeting ever held in the state.

FREE SCHOOL BOOKS.

The act creating the Text-book Commission and defining its powers, also contained an optional free text-book feature, whereby any district might decide for itself whether or not the books should be furnished free. The question could be voted on at the regular annual April election. This annual election occurring on the first Saturday in April, and the law only having become effective on the 1st of March, 1897, the time was too short in which to thoroughly acquaint school district officers with its requirements. As a consequence, comparatively few districts voted upon the question at the ensuing April election. But, notwithstanding, 92 districts adopted free books, including the cities of Butte, Helena and Miles City. We estimate that one-third of the pupils attending the public schools now have their books furnished free under this law.

Notwithstanding the law has not been in operation quite eighteen months, the reports made from those districts adopting free books fully justify all that the friends of the law claimed for it. The law is a success. The reports made to this office from the county superintendents to whom we have sent circular letters specifically asking for information regarding the work of this law, uniformly show that the people like it. We received a letter from a county superintendent which reads as follows:

Glasgow, Montana, Jan. 21, 1898.

"In answering your letter of some time ago concerning free text-books, I would say that the four districts that have adopted them are delighted with them, and I think the districts that did not wish they had.

"At the following April election the remaining four districts adopted free books.

JESSIE BELL, County Superintendent."

The success of free books in many parts of the country was too great and too well known to expect a different result from the adoption of such a law in Montana. Those who hesitated in advocating such a law need hesitate no longer. We predict that in a few years practically all the districts in the state will furnish the books free.

The verdict of the free book states is unanimous to the effect that free books increase attendance, that it makes books cheaper, that it greatly assists in the solution of the problem of compulsory attendance, and that it prolongs the school life of very many pupils. In Massachusetts, the state that has given the system the most thorough as well as the longest trial, it is estimated that the attendance has been increased 10 per cent. All of the states that have adopted the plan report a marked increase in the attendance, particularly in the higher grades. This fact alone is sufficient argument in favor of the adoption of the plan.

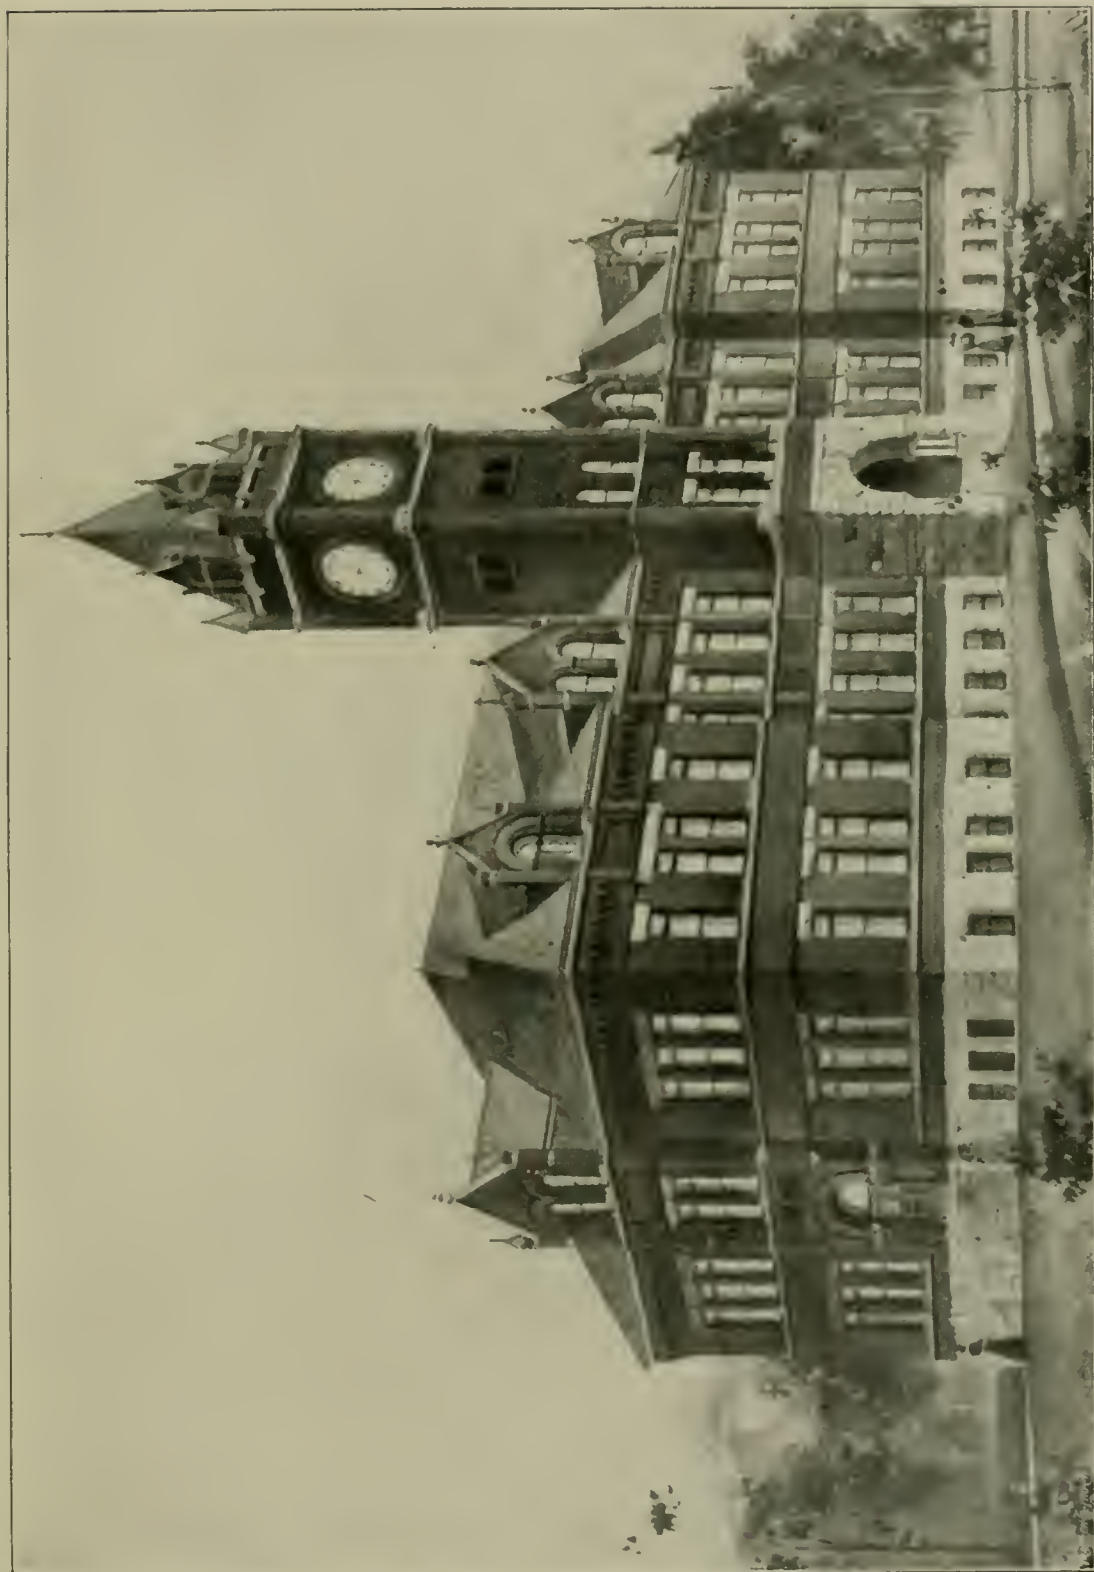

COMPULSORY EDUCATION.

While Montana has a fairly good law upon this subject, contained in Sections 1920-1925 of the Political Code, it is a dead letter. So far as I am able to learn, there has never been a single prosecution under this law, though infractions of it have not been infrequent.

In 1897 there were 2,386 children in the state between eight and fourteen years of age who did not attend any school at all. In 1896 there were 3,162 such children in Montana. During the present school year there were 3,437 who did not attend any school. While we are improving in the matter of attendance, the results are not all that we could wish.

The law is a good one. All it needs is that it be enforced. As our schools improve and the inestimable benefits of a good common school education become more and more understood and more thoroughly appreciated, the number of children not attending any school will continue to grow less.

The only recommendation I desire to make in connection with our compulsory education law is, that those charged by the state with the duty of its enforcement—the school trustees—be earnestly requested to see that this most just and humane law is fully enforced.

STATE UNIVERSITY, MISSOULA, MONTANA.

STATE TEACHERS' ASSOCIATION.

This is a voluntary organization of the active teachers of the state. The purpose of the association is to cultivate and encourage a greater professional spirit among the teachers; to unify the work and to better equip teachers for the duties of their profession.

The association has been organized for about a decade and always has been a strong educational factor in the state.

Every branch of educational work is represented at the meetings. The rural teacher, the graded school teacher and the university teacher, as well as those teaching in private and denominational schools, are members of the association. The meetings are held annually, during the holidays, when the schools are closed. By a vote of the association, the meetings are held at the state capital.

The association is steadily growing in numbers and importance. The meeting of 1897 was the largest in its history. An unusual treat is in store for the teachers at the ensuing meeting, December 27-29. Col. Parker, of the Chicago Normal School, will be present and take part in the discussions, besides delivering a lecture one evening. The meeting promises to be largely attended and a great success.

APPROPRIATION FOR DEPARTMENT OF PUBLIC INSTRUCTION.

In Section 1716 of the political code it is provided that the State Superintendent shall be paid his traveling expenses necessarily incurred in the discharge of his duties, not to exceed five hundred dollars in any one year.

Section 1717 of said code reads as follows: "All necessary expenditures of money incurred by the Superintendent of Public Instruction for postage, stationery, printing and expressage, not exceeding two hundred and fifty dollars in any one year, shall be paid by the state."

The last legislature appropriated a lump sum of five hundred dollars for the expenses of this department for 1897 and a like amount for 1898, but without specifying the amount for traveling expenses or office supplies. The duties of this office have increased to such an extent that it is impossible to maintain this department on five hundred dollars a year. New counties have been created, our school population has nearly doubled in the past decade, and school officers have multiplied, all of which increases the cost of this department. As an example of the growing school interests of the state.

and the consequent increasing expense of this office, it may be state that to-day we have 669 school districts, being an increase of 253 districts in the past ten years. A study of the tables contained in this report is of interest in this connection and shows how great has been our growth along these lines.

When it is remembered that all the school blanks for the entire state, including school registers; all stationery and printing and all office supplies, must be paid out of this amount, besides traveling expenses of the Superintendent in attendance upon the county institutes, and the schools, and all incidental expenses, it is apparent to any one in the least familiar with the magnitude of the work of this department, that this amount will not cover these expenses.

This was fully demonstrated last August, and when the institute season was approaching. Had it not been for the timely action of the State Board of Examiners in furnishing means for the maintenance of this department for the last quarter of the fiscal year, the work of this office would have been seriously embarrassed.

During the month of August last, and when the appropriation to this department was practically exhausted, the Board of Examiners, on the matter being called to its attention, made an order that the expenses of this department for the remainder of the fiscal year, be borne as far as necessary by the appropriation to the State Board of Education, there being fortunately, money enough in that fund to permit of this being done. The expenses of the State Superintendent in attending seventeen county institutes have, for the most part, been paid out of the appropriation to the State Board of Education. This timely action of the Board of Examiners tided us over the emergency, but even they might not always feel justified in taking such action, and thus the department would be left without the funds necessary to run it.

It has cost a trifle over \$750 to run this department for the past fiscal year, as the records show. The amount in excess of the appropriation of \$500 has been paid, as already stated, out of the appropriation to the State Board of Education. Not a dollar has been expended that could have been saved or that the law did not require expended.

Nearly one-fourth of the time is spent by the State Superintendent traveling over the state in the discharge of his official duties. When this is taken into account, in connection with the other work of the department, it is readily seen that the cost of this branch of the state government has been kept within very reasonable limits.

I have gone thus far into details in this matter for the reason that it is important that this department should be able, at all times, to discharge the

duties imposed upon it, and for the further reason that it has been attempted to show that five hundred dollars is ample for the maintenance of this department. The action of the State Board of Examiners, however, which approved of the expenditure of every dollar, and made the provision herein stated for the maintenance of this department for some three months by charging its expense to the State Board of Education, settles the question.

For these reasons I desire to urge upon you and the legislative assembly the necessity of making the full appropriation of \$750, the amount authorized by law for this department. I desire to recommend that the appropriation be made for the two specific purposes named in the statute, office supplies and traveling expenses, \$250 for the former and \$500 for the latter. This sum, I think, will fairly maintain the office.

SCHOOL LIBRARIES.

While Montana has had a school library law for only a few years, still a large number of districts have availed themselves of its provisions and purchased a library for the school. Other districts are beginning to realize the absolute necessity of having a well selected school library if they would give the pupils the opportunities and advantages which the age demands. In the first-class school, to-day, we find the best literature of the world in all the grades, from the primary to the high school. This is wholly practical, since this literature is so graded that it can be thus used.

When *Evangeline*, *The Deserted Village*, *The Ancient Mariner*, *Enoch Arden*, *Ruskin's King of the Golden River*, and many other classics of equal value can be bought for a nickel apiece, there is little excuse for any district not supplying an abundance of the best reading matter.

The value, present and future, of such literature in the public school cannot be overestimated. It makes better scholars for the present and better men and women for the future. But it is to be regretted that in most of the rural schools, where opportunities for coming in contact with the best literature are fewest, no books at all are purchased for the school library, and unless the pupil finds this literature at home, which very often he does not, he will pass through his entire school course without ever knowing anything about it. He is thus, unfortunately, deprived of one of the greatest aids to a successful and happy career.

The books for the school library are selected from lists prepared and approved by the State Superintendent.

Last September I prepared and had published a library list of books of about thirty pages, and caused a copy to be sent to every school board in the state. The list is too long to be printed in this report, but it contains an inexhaustible treasury of the best reading matter and classic literature of the world, and at nominal prices.

The library law, on the whole, is good, but it should be amended, I think, in two particulars. After a district is supplied with a good school library it should be exempted from its provisions, which now require it, annually, to invest a certain per cent. of its funds in library books. Again, there should be a way provided for securing some good books in the country schools where the trustees neglect or refuse to comply with the library law. Notwithstanding the law is mandatory, no attention is paid to it in the great majority of our rural schools, and where it is intended to do the most good.

I, therefore, recommend that the law be so amended that the county superintendent and the trustees be authorized to purchase books instead of leaving the matter, as it now is, entirely in the hands of the trustees, and in case the county superintendent and trustees cannot agree, the matter shall be referred to the State Superintendent for decision after all parties have been given full opportunity of being heard.

SCHOOL LAWS.

The law requires the State Superintendent to print the school laws of the State at least once in four years, and to furnish them as needed to the school officers of the state. In June, 1897, I compiled the school laws of the state and had printed 1,500 copies. This supply was practically exhausted in 1897. There are, approximately, 3,000 school officers in the state, besides more than one thousand teachers. The demand for copies of the school law from school officers and teachers is always great, and in addition thereto there is a demand for them from school officers, teachers and many others from other states. I am of the opinion that a supply should be kept on hand to meet this demand. A willingness is usually expressed to pay for the pamphlet, but I have been unable to comply with a great many requests for copies of the law, as the supply was exhausted. I recommend that the legislature authorize the printing of 3,000 copies of the school law.

STATE EDUCATIONAL INSTITUTIONS.

The law also requires that this report shall contain a report of the State Educational Institutions, but as a full history of their needs and progress will be printed in the report of the State Board of Education, by direction of said board reference only is made here to that report for information concerning them. In the judgment of the State Board of Education, it would incur unnecessary expense to print the report of these institutions in this report and in that of the State Board.

It may be proper, however, to here say that Montana may well be proud of all of her state schools. Though they have been but recently established, they are doing a noble work for the state and are entitled to much credit for the splendid showing they make in so short a time. There is now no longer any excuse for sending our boys and girls out of the state to complete their education. These schools deserve the cordial support of all our people.

CONCLUSION.

I append a number of reports from county superintendents, concerning the progress of the schools in their county.

These reports show more particularly the condition of the schools in the different counties. There is also appended the usual tables giving the data required by law.

There are a number of other subjects which might be properly discussed, but I refrain from doing so lest this report be unduly prolonged.

Our school law is, in the main, a good one—by far the best we have ever had, I believe—still there are a number of changes and amendments that ought to be made, in addition to those herein noticed, to perfect and harmonize it. These will be incorporated into a bill and presented to the legislature for consideration.

Very truly yours,

E. A. CARLETON,
Superintendent Public Instruction.

LIST OF COUNTY SUPERINTENDENTS.

From January, 1899, to January, 1901.

County.	Name.	Postoffice.
Beaverhead.....	Miss Janie V. Carter.....	Dillon.
Broadwater.....	Miss Eva Harrington	Townsend.
Carbon.....	Miss Catherine Feeley	Red Lodge.

Valley.....	Miss Elsie Clough.....	Glasgow.
Yellowstone.....	Mr. Gwen F. Burla.....	Billings.

CUSTER COUNTY.

Miles City, Montana, November 30, 1898.

Hon. E. A. Carleton, Superintendent Public Instruction, Helena, Mont.:

Dear Sir:—In addition to the regular yearly report made to you, I desire to state that at present there are thirty schools in operation, each one under the supervision of a capable, up-to-date teacher. The severe examinations during the past two years have permitted none but the ambitious, well-grounded teachers to obtain certificates. In consequence, the schools of Custer county have advanced rapidly in the past two years.

With but few exceptions the several school boards believe in paying good wages, and in purchasing all necessary appliances to be used for the advancement and assistance of the pupils. Every school in the county has received personal supervision, at least twice, during the term of office, often four times, and occasionally six times, of from one-half session to two days' duration. Institutes were conducted along normal lines, and were universally conceded to be pleasant, profitable and inspiring.

At present there are twenty-five school districts. The number of schools in each varying from one to twelve, with a good average daily attendance.

Trusting my work has been satisfactory to yourself, and that it will prove of some help to my successor, I am,

Very sincerely,

MRS. LAURA ZOOK,

County Superintendent.

FERGUS COUNTY.

Lewistown, Montana, December 3, 1898.

Hon. E. A. Carleton, Superintendent Public Instruction, Helena, Montana:

Dear Sir:—In reply to yours requesting a statement of the condition of the schools of this county for the past two years, I submit the following:

During the past two years we have built five school houses and organized two new school districts. We now have 33 school districts in this county. The trustees and patrons built a good log school house in district No. 33. The patrons built a log school house in district No. 27. In district No. 21, where the assessed value of the property is \$150,000, they voted a special tax of four and one-half mills, this in addition to what money and work was contributed, enabling them to build a nice frame school house. In district No. 1 much interest has been manifested by all. About ten months ago in this

district we voted \$23,000 of bonds, paid off \$6,000 indebtedness, built two frame school houses in the district, and are now constructing a \$16,000 school house in Lewistown. This when completed will be the best and finest building in the county; it is built of brick, trimmed with cut stone. We have a special school tax of five mills in district No. 1.

There has been a great improvement in the schools of Fergus county during the last two years. We have a better grade of teachers now than we had a few years ago. It is a source of pleasure to notice the improvement in primary work. I believe in the primary room is where the most important work is done; there is where the foundation is laid upon which we are to build. During our county institute special attention was paid to primary work. I have visited all schools in the county and many of them two or three times, and as a usual thing found much improvement from one visit to the next. I am sorry that I am unable to furnish a cut of any of our school houses in this county.

Very respectfully,

J. M. PARRENT,
County Superintendent.

FLATHEAD COUNTY.

Hon. E. A. Carleton, Superintendent Public Instruction, Helena, Montana.

My Dear Sir:—Besides what you have required of the County Superintendent in his annual report, he wishes to make some general statements relating to education in Flathead county.

When the county was organized, in 1893, there were but twenty-one school districts, with 1,131 children of school age. Now there are thirty-two districts with a census of 1,939. This is an increase of 808, or a gain of 71 per cent in five years.

In 1893 we had, besides the log houses, but one brick building, at Columbia Falls, and the total value of all school sites and buildings could not have exceeded \$15,000 at that time. There are now twenty-eight buildings; of these 15 are log, 11 frame, and two are made of brick. Kalispell has a building which, with the site, is valued at \$30,000. Libby recently erected a four-department building valued at \$4,000, and several of the new school houses are as good as may be seen in any eastern state. The total value of all sites and buildings is now \$55,150. This does not include the cost of furniture and apparatus.

One of the most hopeful signs of improvement in our schools is the fact that so many districts voted special taxes for the past two years. In 1897 20 districts voted special taxes, raising in all \$16,385.47. This year 16 districts voted taxes amounting to \$9,700.96. The county superintendent has urged each board of trustees to estimate what amount will maintain the school for a year and vote a tax which, added to what will probably be received from the county and state, will give the sum required. This plan is in line with good business principles. The school funds are now in a more satisfactory condition.

During the school year ending August 31, 1897, 1,242 pupils were enrolled in, and \$15,666.33 spent for the schools of the county. Last year 1,531 pupils were enrolled and \$30,750.97 was expended. The balance on hand in 1897 was \$682.22, while the balance in 1898 was \$4,439.50.

General interest in education is shown by our people not only by their liberality in raising funds, but by the moral support they give to the schools. The school attendance is rapidly increasing, the terms are longer, and the demand is the best teachers to be had. On petition, two districts were recently united to form but one; and petitions have been filed to unite three others into one.

Until such time as the state shall prescribe a course, the Illinois course of study has been adopted and is being used in the district schools. It is proving to be very useful. Free text-books were voted in five districts of the county, but on account of lack of funds in two of these, the patrons purchase the books.

Flathead county is justly proud of her schools. Teachers from the east remark on the brightness of the boys and girls they find here. In this bracing atmosphere study is not a difficult task. The short history of Flathead county has been one of progress, educationally and otherwise. Schools and churches mark the ground which a few years ago was occupied by the Indian's tepee. Are we not justified in the future to expect things nobler and better?

N. T. CONKLIN,

County Superintendent Schools.

GALLATIN COUNTY.

Bozeman, Montana, November 15, 1898.

Mr. E. A. Carleton, Superintendent of Public Instruction, Helena, Montana:

Dear Sir:—In this same mail find my annual report of the schools of Gallatin county for the year ending August, 1898.

As county superintendent of the schools of Gallatin county for the past two years, I find them to-day in better condition in every respect which goes to make a school as it should be. During the past year more districts have had longer terms, thus enabling them to secure better teachers and give the pupils of such districts better advantages than they have had before.

Two new school houses have been built during the past year, and now in the 53 districts there are but 15 log houses, and five of these are in good condition.

I regret very much that the state course of study is not as yet completed, but all the rural schools of this county have followed a regular course of study as near like our course in the city schools as was found practicable for the length of terms and the attendance of the rural schools.

Monthly reports have been sent to this office and where the teacher has graded conscientiously, I find some improvement each month.

I wish to thank you for all of your kindly advices, and also grateful thanks are due all the teachers of this county for their hearty co-operation with me during my term of office in making the schools what they are to-day.

Hoping that greater improvement will still crown the succeeding years, I am,

Very respectfully,

IDA M. DAVIS,
County Superintendent.

JEFFERSON COUNTY.

Boulder, Montana, November 25, 1898.

Hon. E. A. Carleton, Superintendent Public Instruction, Helena, Montana.

Dear Sir:—Relative to the biennial report, we believe we may safely say that the schools of Jefferson county, 22 in number, were never more progressive than they are at present; and we may state with confidence that while we admit that during the past two years we have had inflicted upon us, in rare instances, teachers that were not all that could be desired, the present corps of teachers is above the average and one of which our county may well be proud. And while we have been and are still exercising our strength and authority as far as possible to encourage the utmost care in the employment of teachers, we are glad to notice a growing interest on the part of the patrons of our schools in this all important matter.

We believe that we owe much of this improvement to the commendable instruction received at our annual institutes. With the further assistance of that strong factor in education, the State Normal, we hope to see our schools take a place second to none of the county schools of the west. Each of the 22 districts sustain a school term of reasonable length, except five, and these have the minimum, three months. It is hoped that the financial condition of these districts in the future will be such as will enable them to give to their patrons a school term of a more desirable length.

No new school houses have been built during the past two years. The erection of one is now in progress in Clancy. It is hoped that it will be ready for occupancy by January 1, 1899.

Under the present encouraging conditions, our future prospects are highly promising.

Respectfully submitted,

LILLIAN CAREY,
County Superintendent.

MADISON COUNTY.

E. A. Carleton, Superintendent Public Instruction, Helena, Montana.

Dear Sir:—You ask for a brief statement of the condition of our schools. I am pleased to say that our corps of teachers is fine. Progression is the aim, and in almost every instance excellent work is being done. It is my regret that many of our districts draw so little money that trustees feel inclined to reduce wages. On this account several of our best teachers have left us and gone where better wages are paid. As our teachers improve, wages should advance. I am sorry indeed that many of our boards of trustees are such only in name. Some of them are prompt, active and energetic, but others are valueless as school officers. In the latter, the schools run as though no school board existed. The children may thank their teachers for what they receive. .

In many cases, the district accounts had not, prior to my term of office, been compared with the county treasurer's records for years, and gross discrepancies existed as the result of this lack of vigilance.

Some errors have been found in the Treasurer's records (prior to the past few years). Boards have issued warrants without the knowledge of the clerk. Most of these warrants have been provided by traveling agents and "signed on the spot," without a meeting of the board.

I think a law should be enacted imposing a fine upon all school officers who fail to attend to the making of reports to higher officers. To remove such derelict officials for non-performance of duty, is to them a favor and not a punishment, since no salary is attached to most of the offices. Lack of space forbids that more be said.

Yours very truly,

CHAS. W. BIRCHARD,
County Superintendent Schools.

MISSOULA COUNTY.

Hon. E. A. Carleton, Superintendent Public Instruction.

Dear Sir:—I have the honor to submit to you herewith the financial and statistical reports of the school districts of Missoula county, with the following remarks concerning the work for the past two years. While I have done all that I knew to do to make the schools of the county better in every way, I realize that the perfecting of a school system is a matter in which time is an element to be considered and is like the education of an individual, a growth and not a state. I believe the schools of the county are progressing, but that there is room for improvement in many ways. More attention is paid by school boards to the school grounds, outhouses, rooms and furnishings and the employment of teachers than ever before.

As we have the district system, in which the trustees are the power in the local school, every effort has been made to have them realize their responsibility and act in the wisest manner for the interest of the school under their charge. With this object in view, a trustees' meeting was held as one of the sessions of the county institute held in April, at which the following program was carried out:

Powers and Duties of Trustees, Hon. E. A. Carleton, State Superintendent; The Relation of the Trustee to the Teacher and the School, Hon. E. E. Hershey, member Missoula School Board; School Grounds, J. H. T. Ryman, member local University Board; Necessity of Professional Training for Teachers, D. E. Sanders, President State Normal School; What we have a right to Expect of the Common Schools, Dr. O. J. Craig, President State University.

The trustees manifested their interest by voting that such a session be held in connection with the next institute.

Respectfully,

HARRIET HORD,
County Superintendent Schools.

RAVALLI COUNTY.

Hamilton, Montana, December 1, 1898.

Hon. E. A. Carleton, Superintendent Public Instruction, Helena, Montana.

Dear Sir:—In reply to yours requesting a statement of the condition of the schools of Ravalli county for the past two years, I submit the following:

The past two years bear evidence of improvement in the school work of this county, though it has not yet reached the standard which we would have it reach. Generally speaking, the schools are progressing nicely.

The greatest hindrance to the progress of our schools in general is the shortness of our terms. In some districts, owing to lack of funds, we have but three or four months of school during the year. In these cases the teachers are urged to meet such hindrances with well considered policy, economizing time and presenting every subject with all the skill and vigor which they can command and arouse all possible interest in pupils and parents to secure regularity and punctuality in attendance.

The county institute was held in Hamilton, November 29 to December 3, 1897, with 38 teachers enrolled. Great interest was manifested by all present, the teachers were encouraged by the presence of our State Superintendent, Hon. E. A. Carleton, who gave a great deal of useful instruction during the day sessions and a lecture on "The Public Schools," on Wednesday evening, December 1, 1897. This institute was voted the best ever held in the county.

In retiring from the office of superintendent of the common schools of Ravalli county, I leave my best wishes for the cause of education and the progress of the schools.

Yours very truly,

KITTIE OSTERMEYER.

County Superintendent.

SWEET GRASS COUNTY.

During the year 1897-98 two frame school houses have been built and special taxes for lengthening the school term have been raised in six districts. There are 27 school districts in Sweet Grass county, and with one exception all are supplied with comfortable, warm school buildings and fairly good school furniture.

With our corps of 20 teachers, we have been unable to organize a county association of the Montana State Reading Circle, as the distances are too great for the majority of the teachers to come to attend the meetings. How

ever, most of the teachers are following the lines of work mapped out by the State Reading Circle Committee. The interest in professional reading, which is growing in the county, we feel to be due to the excellent institutes which we have enjoyed the past two years.

State Superintendent Carleton and Superintendent J. E. Klock, of Helena, have given us most generously of their time and talents in our county institutes, and the results are to be seen in nearly every school room in the county. Slowly but surely we are departing from the cast iron rules of ancient pedagogy and are daring to bring some of the buoyancy of the natural child-life into our schools. I find flowers and stones and gravel, pictures of animals and fish, newspaper clippings and all the books which the home can spare being gathered into the school room, not only in our town schools but where the "handful are gathered together" in the tiny log school houses. The small country schools suffer from lack of equipment, but the trustees generally are alive to the necessity of maps and globes and books. This year we included globe and dictionary under the head of library expenditures, and with the exception of two districts, all added something to their equipment.

Respectfully,

MRS. BESSIE M. MOORE,
County Superintendent Schools.

TETON COUNTY.

Hon. E. A. Carleton, Superintendent Public Instruction, Helena, Montana.

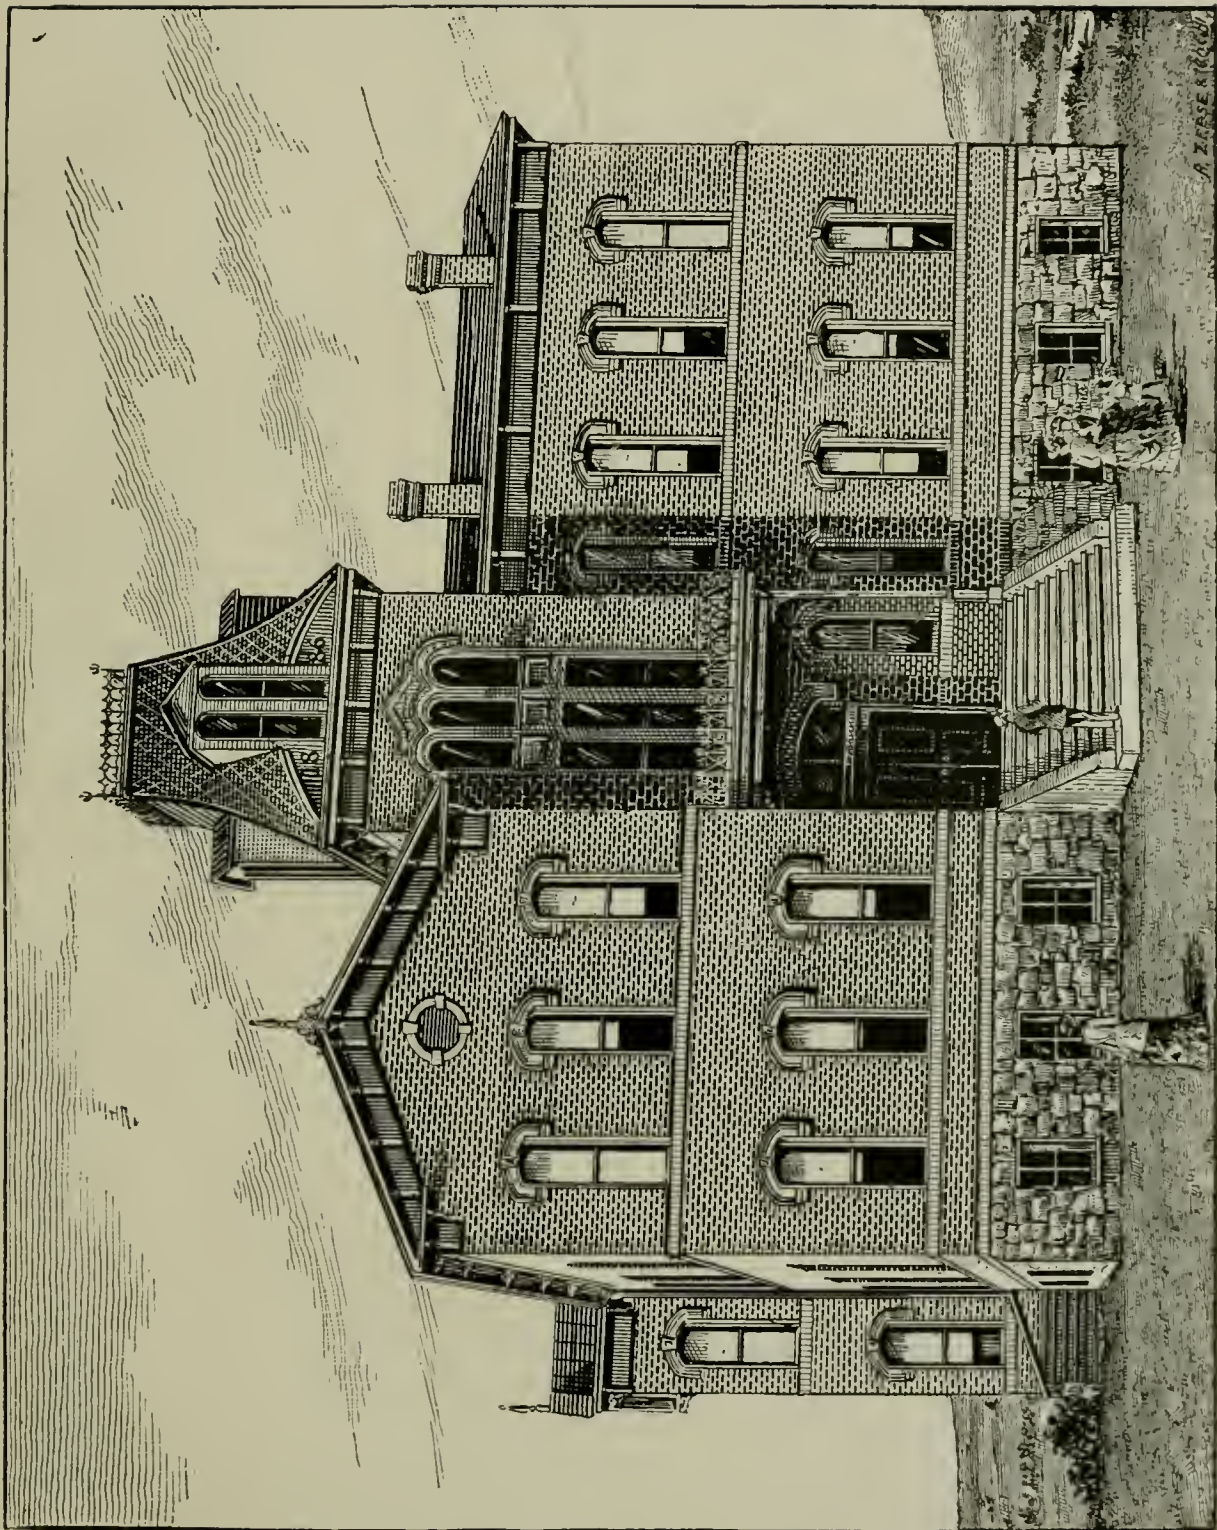

Dear Sir:—The schools of Teton county are in a prosperous condition. During my term of office I have created one new district and helped to organize two schools. We now have six districts with ten schools. One more room has been completed in the Choteau school building, which now contains a high school room, and there are three teachers employed.

Very respectfully,

FLORENCE E. PENRY,
County Superintendent Schools.
